Infrared Imaging Services

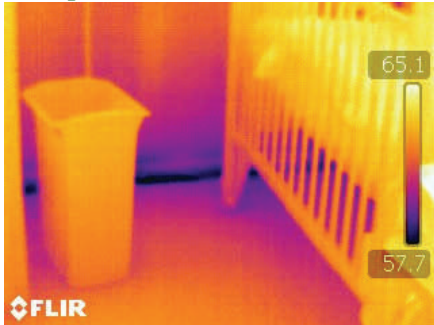

Do you see what we see?

Infrared Thermographic Imaging

Our value-added service can compliment your various building diagnostic needs. With applications in residential and commercial service, we can identify and track issues of moisture, thermal, electrical, mechanical and plumbing systems; indoor, outdoor, and more.

Do you see what we see?

We can “see” the invasion of cold or hot into your home or business. With increased awareness of health, comfort and energy consciousness, we are your best detective source.

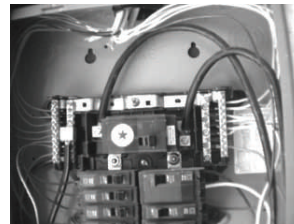

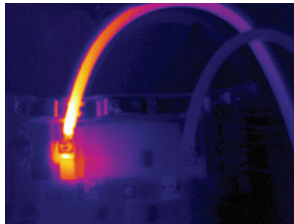

We have committed to using only the best proven quality equipment, and that means industry leading FLIR. Providing FLIR factory trained thermographic imaging services is our assurance that the best quality services are available only from **Glory Energy Solutions.**

Infrared Imaging Services in Predictive Maintenance Programs

Our IR Imaging Services will support your predictive maintenance efforts in electrical, mechanical and plumbing systems; indoors and outdoors.

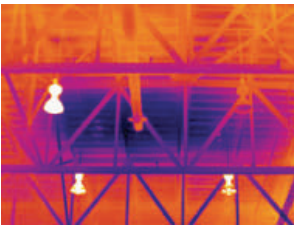

Our services will help you find problems, prevent unscheduled downtime, identify corrective action and improve facility safety, saving time and money in a wide range of commercial and industrial facilities worldwide

Hot lug in a service panel.

Infrared Imaging Services in Building Diagnostics

Moisture can be a serious problem in building materials, damaging structural integrity and nurturing mold. That's why FLIR infrared cameras are widely used in the building industry for moisture remediation

Interior IR survey conducted during daylight hours reveals central area saturated with moisture and in need of repair.

IR images courtesy of FLIR

IR imaging shows heat escaping from a house during those expensive winter heating months.

Custom Written Reports

A printed report is developed for each client; custom reports available upon request. Each report is provided as an electronic format, but can also be provided in a bound, printed form as a finished product.

We will work with you to provide the professional product you need.
